What my clients have come to expect:

My presentations have 4 major objectives. These are designed to assist my audience to benefit maximally from my message and ensure that my client receives the most excellent service and value for money.

Entertainment

I create an entertaining experience through the use of humour, visual imagery, audience participation, inspiring illustrations and telling the stories of people like you and me who have walked life's road, overcome its obstacles and achieved. All this is coupled with my unique style and personal experience, from which I draw to illustrate lessons. I love seeing my audience laugh and enjoy themselves or be moved deeply by a story that inspires.

Inspiration and Motivation

My motivational messages inspire and motivate people to make changes in their lives, which contribute significantly towards achieving company objectives and personal goals, as well as greater personal fulfilment. These talks have given many people renewed hope for a positive future and a more

determined faith in themselves and their abilities. It is always a privilege to see the 'lights go on' in their eyes as paradigms shift and people move to new levels.

A Personalised Message

My clients enjoy the way that I adapt each message to the specific needs of my audience after having done research on the culture of the organisation and the challenges facing my audience. Thus each message is relevant because the examples I use will be based on what the audience is in fact, experiencing in the workplace. Hey, this also makes it a lot more fun.

Take-home Value

Not only do delegates take home powerful images and illustrations burning brightly in their minds, but after my presentation each person has a few powerful principles etched in their minds which help them at home and in the workplace. Each delegate receives a card, which reminds them of the main points of the presentation. They also use the card every day to motivate themselves to persevere and achieve.
